1. President's Speech

KLSCCCI is holding its once a year Annual General Meeting (AGM), which was not easy to be organised due to impact of the COVID-19 pandemic. We started to organise the Online AGM from scratch, only to cancel the originally scheduled online AGM to begin preparation for organising a physical AGM, adhering to the directive of the Registrar of Societies and following the relaxing of gathering activity restrictions by the government after the COVID-19 cases situation in the country has improved.

As we all know, the novel coronavirus pandemic has spread globally for more than 6 months, many countries chose to lockdown their cities and countries in order to break the chain of infection and this has brought about major changes to the daily lives and routine of the people, many activities could only be carried out by adopting the online method. Work from home, virtual cloud meetings, online classes and e-commerce purchases became the strategy for this extraordinary time, but also shown the significance of digitalization. This type of event method has undoubtedly become the development trend of the future, which was especially accelerated due to the requirement for virtual and contactless operating method. I used to tell people that we should think about risks in our safer and more secured times, but now we need to think about making changes in times of risks, entrepreneurs no longer have excuses to refuse change.

Digitalization was the imminent trend, Malaysia launched the "National Industrial Policy 4.0" in order to promote digitalisation of the manufacturing industry and its related services towards Industry 4.0. We are happy to see that smart / intelligent automated production can in fact reduce the reliance on labour, especially foreign workers.

After the pandemic outbreak, with the repatriation of some of the foreign workers and the government's intention to minimize the import of foreign workers, this is the best timing to step forward towards Industry 4.0. However, upgrade and transition is a process that cannot be completed overnight, and still needed the support and initiation of skilled labour in the transition period. Previously, the government has shocked the commerce and industry sectors by the announcement to implement the regulation to only allow the 3 sectors of construction, agriculture and plantation to employ foreign workers. We hope the government can hold consultation and dialogue sessions with the commerce and industry sectors and implement new policies in phases to ensure that the business and operations of various industries would not be interrupted due to sudden shortage of manpower. Especially now that the various industries have faced serious challenges, unexpected announcements would only make the path to recovery more difficult.

A round of pandemic has dealt a serious blow to global economies, with the loss to date still calculating, with many countries which the tourism industry is an important source of income the first being hit. In order to control the pandemic situation, countries have closed their borders, the tourism property chain industries have since halted and adversely affected, if the condition continues to deteriorate and causing heavy losses, these industries would not be able to sustain until the reopening day when global areas turn green. The "Travel Bubble" concept has shed light to the tourism property chain industries, our country's government should consider to implement the "Travel Bubble", to relax the travelling restrictions with some of the countries which have less serious pandemic impact, this would assist the revitalization of the tourism and related industries. Of course, at the preface before implementing the concept of all parties must strictly adhere to the various SOPs as a preventive measure.

At present, Malaysia and Singapore have reached the consensus to establish the Malaysia-Singapore green lane and interval passage arrangements, providing convenience to businessmen and those with work requirement, as long as the test results prior and after the admission are negative, there is no need to undergo the 14 days quarantine and they can proceed with their work itinerary. We also hope that this convenience would be open to pandemic green areas and countries with the pandemic situation under control so that business travellers with economic purposes could conduct work effectively, thus promoting regional economic activities, investment and create job opportunities to expedite our country's economic recovery.

Yesterday, Bank Negara Malaysia announced that the 2nd quarter of 2020 (April to June) has the worst economic growth performance. The Gross Domestic Product (GDP) has shrunk 17.1%, writing the worst record since the financial crisis period in 1998. Performance of most sectors recorded negative growth, while the services and retail industries which were the main contributors of the country's GDP were badly affected. The retail industry undergoing the Movement Control Order coupled with the decrease of tourists was the results for the poor performance and directly impacted the country's domestic market and economy.

In actual fact, consumerism is the propellant of economic growth; KLSCCCI supports the government efforts by launching the Short-Term Economic Recovery Plan (PENJANA) with grants to assist e-commerce and promoting ePenjana, to stimulate domestic consumerism. Besides that, we also hope the government could be concerned in promoting sustainability in operations of conventional shops to generate economic growth and creating job opportunities. ACCCIM held discussions with the Finance Ministry on this matter and submitted related proposals.

Under the double blow of COVID-19 pandemic and Movement Control Order, entrepreneurs have used up their whole strength to survive in adversity, retrenchment and pay cuts have become their reluctant survival options, a sharp decrease in income and the rising rate of unemployment have instantly plunged many families in dire straits. KLSCCCI has always supported welfare and charity activities, ACCCIM and KLSCCCI have donated RM100,000 and RM20,000 respectively to Tzu Chi Foundation in support of the “Kita1Keluarga Relief Programme” to reach out to poor families in need. We also hope that more people could join this effort and contribute generously to society and help them through this difficult time.

Since the beginning of this year, the Chamber has cancelled many activities with the health and safety of participants as the primary concern. In the second half year, the Chamber has adjusted our activity organisation method following the new norm. Fortunately, with the advance in time and technological products, we are able to overcome the limitation of area and space to meet, KLSCCCI has planned a series of webinars to share on current topics of concern on live streaming platform, inviting experts to analyze and share on how the various industries could breakthrough and overcome the difficulties face in recovery of their business operations.

The series of KLSCCCI Webinars has been organised online since mid of July 2020, as to date 4 webinars have been organised online. We will organise a Webinar on “Digital Transformation – How can SMEs Leverage the Government Grant?” next week; we welcome all of you to participate actively. We will continue to bring you more different perspectives and practical information and sharing of different industries in every upcoming webinar. I urge all of you to grab this opportunity and hopefully could benefit from the Webinars.

In the remaining few months of 2020, I believe there will not be many opportunities for us to meet, despite that, KLSCCCI will still firmly stay on guard, in order to continue in providing services to our members and in striving for the greatest interests of our members. Should anyone of you have any enquiries or views, please email it to our Secretariat. Meanwhile, do remember to browse our website and Facebook page for latest updates, and also our monthly e-bulletin which could be obtained via the above methods.

At present, our country has entered into the Recovery Movement Control Order period, although all aspects are in gradual recovery, but it does not mean that we could put down our alertness. Recently, the number of positive cases has fluctuated up and down, we hope that everyone must stay alert to prevent the pandemic from getting serious. At these extraordinary times, everyone must practice all the preventive personal hygiene, by maintaining good habits, wear facial masks, wash hand frequently, maintaining physical distancing. We earnestly wish that the COVID-19 pandemic would end soon, and our lives could return to the normal track.

Lastly, I would like to thank every one of our members present today, as because of your companionship along the way, KLSCCCI can continue moving forward, contributing to society. I hereby wish all of you good health and best wishes. Thank you.

2. Confirmation of Minutes of Previous AGM (1st June 2019)

The Meeting unanimously approved the minutes of the Annual General Meeting held on 1st June 2019 as proposed by Datuk Chan Mung Bong and seconded by Mr. Ng Chee Len.

3. To Adopt the Annual Report and Audited Financial Statements dated 31st December 2019

Honorary Secretary General , Mr. Gan Boon Khim summarized the report as below:

The 2019 Annual Report has detailed reports on the activities of the Chamber in 2019. Members may scan the QR Code to read through the contents.

Year 2019 was a busy yet fulfilling year. A total of 133 meetings were held by the 20 working committees and ad-hoc committees set up by the Chamber, with an average of more than 10 meetings per month.

In terms of activities, the Chamber has organised a total of 78 activities, of which 33% were seminars/sharing sessions/training courses; 21% were overseas and domestic delegation reception; 17% were gathering / networking dinners; 14% were visits / corporate visits; the other 15% were cultural , educational and charity, national unity activities such as award presentation ceremony (Mahua Literature Award/ MyHero Award/ Scholarship Fund Presentation), green packets / national flags distribution, trade mission, etc.

In addition to the annual grand events (with thousand people banquet, 100 tables) 115th Anniversary Dinner, the Chamber also held the inaugural full-day “Malaysian SMEs Business Summit” in 2019. The discussion topics were extremely comprehensive, covering topics including big data, E-Commerce, Industry 4.0, retail, finance, etc. About 600 participants attended the event.

Besides, the Welfare Committee also successfully held the “KLSCCCI Charity Golf Championship and Charity Dinner” for the first time, to raise the welfare fund of the Chamber in one shot for the usage of organising a series of charitable activities for the next three years.

After the launching of the "KLSCCCI Gallery" in early year 2019, which records the history of the hundred years history of the Chamber, within just one year, 42 delegations (mainly overseas delegations) from local and abroad have visited the gallery. At the same time, the official website of the "KLSCCCI Gallery" has also been uploaded, members may browse the Chamber's history online. Currently, the Chamber is cooperating with the Malaysia Chinese Research Centre (MCRC), University of Malaya and Universiti Malaya Press (UMP) to publish a Coffee Table Book titled "Lead and Grow – 115 years of KLSCCCI ", which is expected to be released by the end of this year.

In order to move towards digitalization and protect the natural environment, in response to the paperless campaign, the “KLSCCCI Bulletin” published by the Chamber has been transformed into electronic version from January 2019, and from quarterly (every 3 months) to monthly publication, so that members can enjoy timely information. In addition, the Chamber also adopted paperless mode to conduct all meetings beginning from year 2019, and no longer printing hardcopy meeting documents for meeting attendees.

After the outbreak of the COVID-19 pandemic in China in early this year, KLSCCCI responded to the call by ACCCIM in early February to donate 300 cartons of medical gloves (RM34,800) to hospitals in China. Following the spread of COVID-19 pandemic to our country, during the Movement Control Order (MCO) period, the Chamber also

supported the donation of RM2 million called by ACCCIM to the The Edge Media Group to raise funds for medical supplies and support funds for HealthCare Workers. KLSCCCI's Council Members and members of the Chamber raised a total of RM1,066,500.

Honorary Treasurer , Dato' Tay Sim Kim reported as below:

Please refer to page 60 to page 82 of the annual report for the audited financial statement 2019. The total income of the Consolidated Fund (inclusive of General Fund and Scholarship Fund) of the Chamber in 2019 was RM3,394,097.00, while total expenditure (inclusive of depreciation) was RM3,381,079.00, with a surplus of RM13,018.00. While preliminary tax estimation payable for the General Fund in year 2019 by BDO was RM 9,326.00.

The Meeting unanimously approved the Annual Report and Audited Financial Statement dated 31st December 2019 as proposed by Dato' Lim Kiam Lam and seconded by Mr. Tai Chin Peow.

4. To Appoint Auditor

The Meeting unanimously approved the appointment of BDO as the Chamber's Auditor as proposed by Mr. Michael Chai Woon Chew and seconded by Mr. Choong Pin Hoong.

6. To Adopt Resolutions

Chairman of the Resolution Committee, Mr. Michael Chai Woon Chew reported that a total of 16 resolutions, which cover the national socio-economy; commerce; industry and agriculture development; taxation; human resource development; and security issues were proposed to be adopted as follows:

A. NATIONAL SOCIO-ECONOMY

6.1 To Swiftly Take Measures To Resuscitate The Property Sector

Resolution: The Chamber urges the Government to swiftly take measures to resuscitate the property sector.

Rationale : Due to the impact of the COVID-19 pandemic and the Movement Control Order, coupled with the challenging economic environment of the past few years, the Malaysian property sector is facing more severe challenges. It is deeply concerned that the property sector, which had long been in the doldrums, is expected to stay sluggish for a longer period given the sharp economic downturn. The stubbornly overhang in the property sector will have a reverberating effect on the economy given that it is an important sub-sector of the construction sector.

The relevant measures should include: an extension of time (especially

for ongoing housing development scheme) or waiver of Liquidated Ascertained Damages (LADs); a reduction on capital contribution charges by 50%; expedite the Approval of HDA Account (Regulation 9) Excess Money Release in less than 1 month; request LPPSA (Government Loan Department) to release payment to developers in less than 2 weeks.

Besides, the freeze on the Malaysia My Second Home (MM2H) programme also affects the sales and promotion of local properties.

Solution : To write to the Prime Minister, Ministry of Finance, Ministry of Housing and Local Government, Ministry of Tourism, Arts and Culture.

6.2 To Formulate A Plan To Revive The Economy After The MCO

Resolution: The Chamber urges the Government to formulate a plan to revive the economy after the Movement Control Order (MCO).

Rationale : COVID-19 induced deep global recession. Softer discretionary spending and restricted movement throughout the MCO have resulted in a sharply lower than normal consumer spending.

KLSCCCI agrees with The Associated Chinese Chambers of Commerce and Industry of Malaysia (ACCCIM) that after the COVID-19 global pandemic, the immediate priorities should be: to restore confidence on economic and political stability, reassure policy continuity, swiftly implement economic stimulus package, sustain private consumption, implement targeted fiscal spending, uplift exports capacity, reinvigorate sluggish property sector. While the medium- to long-term strategies should rest on five key pillars: fiscal stability and growth stabilisation pact, unlocking new sources of growth, reinforce competitiveness and productivity nexus, smart and digital technology-driven investment, upskilling workforce and education for the future.

Solution : To write to the Prime Minister.

6.3 To Support The Promotion Of Buying “Made-In-Malaysia” Products

Resolution: The Chamber supports the Government to promote the buying of “Made-in-Malaysia” products.

Rationale : The robust and sustained domestic market demand for *Made-in-Malaysia* products would strengthen the capabilities of domestic manufacturing industries, especially small and medium-sized enterprises, which in turn enhance their efforts to build brand integrity in export markets.

During the financial turmoil in 1997, KLSCCCI initiated the “EXPO Cintai Malaysia” to encourage Malaysians to buy and use Malaysia made products and services, which was able to stimulate domestic consumption and help revitalize our nation’s economic growth.

Solution : To write to the Prime Minister, Ministry of International Trade and Industry, Ministry of Domestic Trade and Consumer Affairs. To jointly meet and interact with relevant departments with other organisations.

6.4 To Provide More Funds And Tax Deductions For Promoting National Unity Activities

Resolution: The Chamber urges the Government to provide more funds on promoting national unity activities and tax deductions to encourage companies to allocate Corporate Social Responsibility (CSR) allocation funds on unity programmes.

Rationale : Multi-ethnic, multi-religious, multicultural and multilingual have been characteristic of Malaysia since its independence. More allocation in the budget to activities that are promoting national unity and harmony in the pluralistic society will help strengthen the unity of all races, enhance the sense of belonging to the country and further promote social stability and prosperity of the country. Tax deductions will encourage more corporations to actively organise the projects that promote national unity so as to fulfil their social responsibilities.

Solution : To write to the Prime Minister's Department, Ministry of Finance, Ministry of National Unity.

B. COMMERCE, INDUSTRY AND AGRICULTURE DEVELOPMENT

6.5 To Accelerate The Approval Process Of The Technology Readiness Audit

Resolution: The Chamber urges the Government to accelerate the approval process of the technology readiness audit so that applicant companies could accelerate the adoption of IR4.0 and the digitalisation of their businesses.

Rationale : We must learn from the MCO period of COVID-19 pandemic that most businesses can still continue to operate online and similarly production can continue with less workers if the processes are digitalised and also be automated.

Solution : To write to the Ministry of International Trade and Industry, Malaysia Digital Economy Corporation (MDEC).

6.6 To Strengthen Promotion On Domestic Cultivation Of Agricultural Products In Order To Meet Domestic Demand, Expand Export Markets And Reduce Imports

Resolution: The Chamber urges the Government

- a. To allocate 1% of planting land that are relatively flat and close to main roads in each state to qualified farmers or companies, or even cooperatives to grow agricultural products in a one-stop manner;
- b. To give farmers more incentives and subsidies, lower taxes, and

call on banks to provide low-interest loans;

- c. To reduce imports of agricultural products to avoid affecting the local market and to vigorously promote local agricultural products;
- d. To promote, guide and assist farmers to explore online sales in addition to physical sales.

Rationale : Farmers in the country have always faced the dilemma of not owning arable land. Most of the farmers are unable to buy land for planting because of the high land prices and difficulties in obtaining loans. Meanwhile, some of the agricultural land leased by the Ministry of Agriculture or other government units are rugged, the soil is lacking in natural minerals and the geographical location is far away.

The Government has been calling on farmers to move into mechanised cultivation to keep up with technological advances and resolve the problem of labour shortage. Farmers agree in principle and intend to start mechanised operations, but the rugged terrain causes obstacles to mechanisation. In addition, the remote geographical location causes higher transportation cost, and the agricultural products are easily damaged during transportation.

Solution : To write to the Ministry of Agriculture and Food Industries, Minister in Prime Minister's Department (Economy), Ministry of Energy and Natural Resources, Selangor State Government.

6.7 To Strengthen The Promotion Of The Downstream Industries Of Agricultural Products

Resolution: The Chamber urges the Government to strengthen the development of downstream industries of agricultural products and upgrade the technology for agricultural products preservation, to provide subsidies and incentives, and to strengthen the technical research and development on agricultural products harvesting and downstream sectors in Faculty of Agriculture of various universities / colleges.

Rationale : When the agricultural products market suffers from oversupply or labour shortage, and unable to export in time, farmers are often forced to sell at a cheaper price and even discard their agricultural products. This situation has indirectly discouraged farmers to plant in large quantities, resulting in unstable supply and marketing of agricultural products, which also limits the ability to export.

Solution : To write to the Ministry of Agriculture and Food Industries, Minister in Prime Minister's Department (Economy).

6.8 To Emphasise On The Importance Of Seedling Cultivation, Research And Development (R&D)

Resolution: The Chamber urges the Government to provide subsidies and incentives to assist local seedling nurseries to expand the production and quality of seedlings, to strengthen the R&D on seedlings in Faculty of Agriculture of various universities / colleges, to shorten the import procedures for

seedlings, especially for experimental seedlings, and to educate farmers to choose high-quality seedlings.

Rationale : Seedling quality and variety are the fundamental and important part of the entire industry chain. Because of climate change and the deterioration of soil quality due to the effects of pesticides and rain, food crops are increasingly vulnerable to pests and diseases. Therefore, the R&D on quality seedlings and new varieties is very important.

Solution : To write to the Ministry of Agriculture and Food Industries, Minister in Prime Minister's Department (Economy).

- *The meeting proposed to expedite the importing procedures of seedling, especially for those catering for experiments purpose.*

6.9 To Encourage Locally Incorporated Companies To Invest In Share / Financial Market Of Malaysia And Urge The Government To Provide Tax Exemption In Short Term For Companies' Investment Profit Earning Below RM1 Million

Resolution: The Chamber encourages locally incorporated companies to invest in share / financial market of Malaysia and urges the Government to provide tax exemption in short term for companies' investment profit earning below RM1 million.

Rationale : The global financial market already beset by uncertainty around the growing global economic toll of the coronavirus outbreak. Malaysia's market taking a hit, in line with a global sell off, as investors scurried away over fears of the economic impact from the coronavirus outbreak.

In order to sustain economic growth, the Chamber encourages more private investments, while also accelerating public investments. The Chamber also urges the Government to provide tax exemption on companies' investment profit earning below RM1 million for the next 12 months after Movement Control Order (MCO). An encouraging investment growth helps to create stable job opportunities and promote sustainable economic growth.

Solution : To write to the Ministry of Finance.

- *The meeting proposed to keep in view the above resolution. Meanwhile, to decide if to adopt the above resolution after checking with the tax consultant on whether the return on company investment in share market is considered a taxable item.*

6.10 To Relax The Regulations On The Status For Multimedia Super Corridor Companies

Resolution: The Chamber urges the Malaysia Digital Economy Corporation (MDEC) to relax the regulations on the status for Multimedia Super Corridor Companies.

Rationale : With the outbreak of the COVID-19, many local companies have switched to work from home to minimise the risk of infection. This is of utmost importance in preventing the spread of COVID-19.

The office space size requirement should be based on the number of

employees and in general, the space of 250 square feet should be sufficient. With the implementation of physical distancing, some office space such as meeting rooms and receptions are no longer needed.

Solution : To write to the Malaysia Digital Economy Corporation (MDEC).

- *The meeting proposed to revise the above to relax the regulations on the status for Multimedia Super Corridor Companies, including relaxation of office space size requirements, office locations, applications for foreign employees of Class C, etc.*

C. TAXATION

6.11 To Replace SST With GST

Resolution : The Chamber urges the Government to replace the Sales and Services Tax (SST) with Goods and Services Tax (GST), the level of GST should be set that the net impact to consumer prices should not be higher.

Rationale : In the ACCCIM's Malaysia's Business and Economic Conditions Survey (M-BECS) for the period of second half-year of 2018 and first half-year of 2019, 54.6% respondents had indicated that GST is a more preferred tax regime than SST.

The GST should not increase the burden of the low-income households. It should be zero-rated for essential goods and services and a standard rate for others, with exemptions given to some critical services. GST would broaden the consumption tax base as well as to reduce the dependency on oil related revenue.

Solution : To write to the Prime Minister, Ministry of Finance.

- *The Meeting proposed to fix the GST rate at 3% for the above.*

6.12 To Provide Tax Incentives And Deductions To Companies Participating In PLIP And Offering Industrial Training

Resolution : The Chamber urges the Government to provide tax incentives and deductions to companies which are participating in *Program Latihan Industri Perpaduan (PLIP)* and offering industrial training for 3, 6 or 12 months to the unemployed due to the MCO.

Rationale : Under the influence of the MCO, many companies reduced their manpower to reduce operation costs. According to the report of the Malaysian Institute of Economic Research (MIER) in March 2020, about 2.4 million Malaysians are estimated to lose their jobs due to the COVID-19 crisis. The effects of unemployment on the economy are severe and should be resolved quickly.

Solution : To write to the Ministry of Finance, Ministry of Human Resources.

D. HUMAN RESOURCE DEVELOPMENT

6.13 To Strengthen Practical Courses Of Technical Skills, IT And Computer To Cultivate Talents That The Industries Lack Of

Resolution : The Chamber urges the Government to strengthen practical courses of technical skills, IT and computer, and to promote measures for improving English proficiency to enhance the mastery of technological knowledge and cultivate talents that the industries lack of.

Rationale : At present, there is a shortage of professional technicians who can monitor and operate machinery and equipment of high technology. Information technology and technical knowledge become more important when the outbreak of COVID-19 has forced many companies and institutions to work from home.

However, according to the survey, there are only 30% of students choosing Science stream. The Government should strengthen practical courses of technical skills, IT and computer, so that students can master the professional skills and strengthen their knowledge in school, which could help them adapt to the new professional requirements of the industries.

Solution : To write to the Ministry of Education, Ministry of Human Resources, Ministry of International Trade and Industry, Ministry of Science, Technology and Innovation.

- *The meeting proposed to include the promotion of improving English proficiency to enhance the mastery of technological knowledge.*

6.14 To Immediately Recognize The UEC

Resolution : The Chamber urges the Government to immediately recognize the Unified Examination Certificate (UEC).

Rationale : In line with the recognition of UEC by foreign and domestic private tertiary institutions, UEC should be recognised so that students from Independent Chinese Secondary Schools could have relevant opportunities for further studies and employment.

Independent Chinese Secondary Schools help the country to cultivate talents needed for industrial development and the skills of students could be enhanced by providing training through connection with local universities and overseas colleges that help the country move towards a high-end manufacturing industry.

Solution : To write to the Ministry of Education.

- *The meeting proposed to include the importance of Chinese language in the resolution as it will become one of the important languages used worldwide in the future.*

6.15 To Formulate An Appropriate Education Policy In Response To The COVID-19 Pandemic To Avoid Affecting The Learning Progress Of Students

Resolution : The Chamber urges the Government to formulate an appropriate education policy in response to the COVID-19 pandemic to avoid affecting the learning progress of students.

Rationale : School education is interrupted by the sudden outbreak of COVID-19 and has become an unprecedented severe challenge for the nation. Before the pandemic is fully under control, education policies should be reviewed accordingly and the new mode of online teaching can be adopted regardless of the suspension or gradual reopening of schools, so as not to delay students' studies. Besides, we should also pay attention to students who have dropped out of school due to the impact of the pandemic to avoid causing more social problems.

The hardware and software facilities of online teaching are the main issues that the Ministry of Education (MOE) should overcome in priority. On one hand, MOE needs to provide accurate guidelines to the schools to ensure the quality of the online teaching system. On the other hand, MOE can cooperate with the Ministry of Science, Technology and Innovation to upgrade the online platform or combine forces with the private sector and society to mobilise more resources in helping schools, parents and students adapt to the new education measures, this includes providing equipment for online classes or upgrading network services, which will help to provide students of all levels equal opportunities to obtain knowledge.

Solution : To write to the Ministry of Education.

- *The meeting proposed to include the improvement of the facilities for online teaching in the resolution, so that teachers can perform teaching tasks more efficiently.*

E. SECURITY ISSUE

6.16 To Combat Crime Strongly In Order To Maintain Social Order Comprehensively

Resolution : The Chamber urges the Government to combat crime strongly in order to maintain social order comprehensively.

Rationale : Many companies are forced into staff layoffs and bankruptcies due to the outbreak of COVID-19 and economic recession, which eventually triggering the wave of unemployment. Employees who lost their jobs and income may involve themselves in crimes to solve their livelihoods problems. Meanwhile, the incidents of phone call scam still happening one after another.

The Chamber urges the Government to mobilise more police forces to carry out patrolling tasks, strengthen educational measures to improve awareness, publish the standard operating procedures and authorities of enforcement parties, seek cooperation from telecommunications companies to set exclusive hotline numbers for enforcement parties so as to avoid criminals taking advantage. Taking precautions against crimes

will help ensure a safe living environment, peace and security of the society.

Solution : To write to the Prime Minister, Ministry of Home Affairs and hold dialogue with the police.

After members of KLSCCCI expressed their views and suggestions, the Chamber will revise the related resolutions accordingly. As for resolution (9), will seek advise from tax consultant to comment and revise accordingly.

The meeting unanimously approved to adopt the above resolutions.

7. Other Matters

Mr. Liew Min Tat (Nam Foh Realty Sdn. Bhd.) suggested to gather members of KLSCCCI especially in Information Technology industries to interact and seek for funding to invest in potential start-ups companies. Besides, to work with technical and vocational institutions to train and enhance the youths' research ability.

President informed that the Chamber has been organising Business Opportunity Network (BON) regularly to promote the interaction between members. The BON activities were interrupted due to the COVID-19 pandemic. The Chamber will continue to organise such activities when the pandemic situation has improved.

Besides, the World Chinese Entrepreneurs Convention to be held in 2021 will include a pitching session to seek for crowd funding for potential projects of various countries.

The meeting adjourned at 1.00p.m.

Progress Report On Resolutions For Annual General Meeting 2020

(1) To Swiftly Take Measures To Resuscitate The Property Sector

Progress: On 6th October 2020, the Chamber wrote to the Prime Minister, Ministry of Finance, Ministry of Housing and Local Government, Ministry of Tourism, Arts and Culture to urge the Government to swiftly take measures to resuscitate the property sector.

The Ministry of Tourism, Arts and Culture replied on 17th December 2020, stating that the Government has decided to temporarily freeze the Malaysia My Second Home (MM2H) programme to free up time for the Ministry and related agencies to comprehensively discuss and re-evaluate the MM2H programme. This freeze is in line with the Government's decision to close the border and not allowing foreign citizens to enter Malaysia due to the current COVID-19 pandemic situation.

The Ministry of Housing and Local Government replied on 11th January 2021, stating that the Temporary Measures for Reducing the Impact of Coronavirus Disease 2019 (COVID-19) exempts the developers from paying Liquidated Ascertained Damages (LADs) due to the implementation of Movement Control Order or COVID-19. As for Approval of HDA Account Excess Money Release, it depends on the developer's compliance with established guidelines and checklists. In addition, the Ministry will discuss with LPPSA (Government Loan Department) to improve the procedure for releasing payment to developers.

(2) To Strengthen Promotion On Domestic Cultivation Of Agricultural Products In Order To Meet Domestic Demand, Expand Export Markets And Reduce Imports

Progress: On 6th October 2020, the Chamber wrote to the Ministry of Agriculture and Food Industries, Minister in Prime Minister's Department (Economy), Ministry of Energy and Natural Resources, Selangor State Government to urge the Government

- (a) To allocate 1% of planting land that are relatively flat and close to main roads in each state to qualified farmers or companies, or even cooperatives to grow agricultural products in a one-stop manner;
- (b) To give farmers more incentives and subsidies, lower taxes, and call on banks to provide low-interest loans;
- (c) To reduce imports of agricultural products to avoid affecting the local market and to vigorously promote local agricultural products;

- (d) To promote, guide and assist farmers to explore online sales in addition to physical sales.

The Office of Chief Minister of Selangor wrote on 25th November 2020 and forwarded the Chamber's letter to the Selangor State Agricultural Development Corporation with carbon copy to the Chamber for information.

(3) To Strengthen Practical Courses Of Technical Skills, IT And Computer, And To Promote Measures For Improving English Proficiency To Enhance The Mastery Of Technological Knowledge And Cultivate Talents That The Industries Lack Of

Progress: On 6th October 2020, the Chamber wrote to the Ministry of Education, Ministry of Human Resources, Ministry of International Trade and Industry, Ministry of Science, Technology and Innovation to urge the Government to strengthen practical courses of technical skills, IT and computer, and to promote measures for improving English proficiency to enhance the mastery of technological knowledge and cultivate talents that the industries lack of.

The Ministry of Education replied on 5th January 2021, stating that the *Kurikulum Standard Sekolah Rendah (KSSR)* and *Kurikulum Standard Sekolah Menengah (KSSM)* aim to holistically develop each student's potential. In order to meet this requirement, the improvement of students' knowledge and skills in the technology sector including Science, Technology, Engineering and Mathematics (STEM) is emphasized, especially at the upper secondary level.

(4) To Immediately Recognize The UEC

Progress: On 6th October 2020, the Chamber wrote to the Ministry of Education to urge the Government to immediately recognize the Unified Examination Certificate (UEC).

The Ministry of Education replied on 5th January 2021, stating that the recognition of the UEC is not only an issue about examination, but covers a larger subject i.e. the national education system. Therefore, this issue should be handled carefully so that any decision made by the Government will not cause confusion in the education system, while adhering to the National Constitution and respecting the National Education Policy.

(5) To Formulate An Appropriate Education Policy In Response To The COVID-19 Pandemic To Avoid Affecting The Learning Progress Of Students

Progress: On 6th October 2020, the Chamber wrote to the Ministry of Education to urge the Government to formulate an appropriate education policy in response to the COVID-19 pandemic to avoid affecting the learning progress of students.

The Ministry of Education replied on 5th January 2021, stating that when the schools reopened after the first wave of the pandemic, the Ministry has adjusted the content of the curriculum based on *Kurikulum Standard Sekolah Rendah (KSSR)* and *Kurikulum Standard Sekolah Menengah (KSSM)*, implemented *Pengajaran Dan Pembelajaran Di Rumah (PdPR)* based on the adaptability of teachers and students, and provided teachers with relevant guidelines to ensure the success of course adjustment and PdPR.

(6) To Formulate A Plan To Revive The Economy After The MCO

Progress: On 6th October 2020, the Chamber wrote to the Prime Minister to urge the Government to formulate a plan to revive the economy after the Movement Control Order (MCO).

Motions Submitted To The Associated Chinese Chambers Of Commerce And Industry Of Malaysia (ACCCIM)

The Associated Chinese Chambers of Commerce and Industry of Malaysia (ACCCIM) held its 74th Annual General Meeting (AGM) at the Seng Peng Hall, Ground Floor, Wisma Chinese Chamber on 29th July 2020 (Wednesday). The meeting unanimously passed a total of 38 motions, of which 10 were tabled by KLSCCCI on its own or jointly with fellow chamber(s) from other state(s). The motions were as follows:

A. NATIONAL SOCIO-ECONOMY

3. Motion: The AGM urges the Government to formulate post-Movement Control Order (MCO) Economic Revitalisation Plan. The immediate priority strategies are restore confidence on economy and political stability, ensure consistency in Government policies, expedite the implementation of economic stimulus packages, sustain private consumption, swiftly implement targeted fiscal spending, uplift exports capacity, and rejuvenate construction and sluggish property sector. Whilst the medium-long term strategies constitute five key pillars, i.e. fiscal stability and growth stabilisation pact, unlocking new sources of growth, reinforce competitiveness and productivity nexus, smart and digital technology-driven investment, and upskilling workforce and education for the future.
7. Motion: The AGM urges the Government to intensify its efforts to stimulate the real estate market with more comprehensive and beneficial measures, including:
 - (a) To allow for an extension of time (especially for ongoing housing development scheme) or waiver of Liquidated Ascertained Damages (LADs) arising from the delay of works at site caused by the MCO or other COVID-19 supply chain issues;
 - (b) Capital contribution charges should be reduced by 50% since developers are already mandated to lay infrastructure at development projects;
 - (c) To zerolise the Real Property Gains Tax (RPGT) rate from 5% and 10% for the disposal of properties held for more than 5 years by the Malaysia citizens, permanent residents and foreigners respectively;
 - (d) RPGT to impose only on the third and subsequent property disposed of as most home owners have two properties in their lifetime for owner-occupied and long-term investment;
 - (e) In the absence of property speculation and also to clear the overhang units, the perpetual 10% RPGT penalty on foreigners should be abolished to encourage foreign purchases. The RPGT regime can be reviewed and reinstated when the property market recovers and there is active speculative investment;

- (f) To consider abolishing the Real Property Gains Tax (RPGT) for a period of 3-5 years as it will certainly boost investors' and buyers' sentiment to help clear the overhang property as well as boost new sales. The RPGT can be reinstated when there is strong presence of speculative investment;
- (g) Evaluation of real estate cooling measures:
 - (i) To review the loan amount applicable to borrowers who purchase three or more properties, capped at 70% of the loans;
 - (ii) To allow loan period to extend to 40 years or 70 years for properties cost less than RM 500,000 (instead of the existing RM 300,000); and
 - (iii) To reinstate the Developer Loan Interest Bearing Scheme (DIBS) for properties below RM 700,000.
- (h) To allow foreigners to purchase any real estate in Malaysia (besides affordable housing);
- (i) The Government needs to ensure stable prices of cement and other building materials so as to ease the construction costs. It is proposed that a review of SST and import duties on essential building materials be carried out;
- (j) The use of Industrialised Building System (IBS) technology will not only realise Government's vision in building affordable public housing, but also reduce dependency on foreign workers. It is suggested to provide more incentives to developers and contractors, as well as suppliers to ease their investment costs in adopting IBS technology. In addition, some form of tax relief and subsidies should be provided to encourage the building of sustainable, eco-green and smart homes.

B. Commerce, Industry And Agriculture Development

- 16. Motion: The AGM supports the "Jom Buy Made-in-Malaysia Products" campaign promoted by the Government.
- 19. Motion: The AGM urges the Government to adopt more aggressive strategies in developing local agricultural industry, promoting modern agriculture, and boosting agricultural productivity, including:
 - (a) To open up more arable wasteland for the people to apply, and to grant land use rights for a minimum of 30 years to benefit farmers' development plans;
 - (b) To encourage farmers to invest in research and development (R&D) in order to improve the quality and quantity of crops production so as to meet the domestic demands, and ultimately expand the foreign market demands;
 - (c) To provide more incentives and subsidies for farmers, reduce income tax, and urges the banks to provide low-interest rate loan facilities;

- (d) To promote, consult and assist in developing online sales channels;
- (e) To enhance the downstream fruits industry development, and to improve the technology of fruit preservation;
- (f) To assist local seed breeders in producing sturdier plants and higher yields, as well as strengthening R&D on seedlings.

20. Motion: The AGM urges the Government to utilise part of the foreign workers' levy collected as financial aids to intensify publicity and subsidise training courses organised to assist SMEs in automation transformation in moving towards Industry 4.0. The Government also needs to expedite the approval for skills assessments so that businesses can accelerate the adoption of Industry 4.0 and digital transformation.

C. Taxation

22. Motion: The AGM urges the Government to reintroduce the Goods and Services Tax (GST) to replace the Sales and Services Tax (SST) regime. The GST rate should be set at a level that does not impact net prices of goods and does not burden the consumer. GST is proven to be a more comprehensive taxation mechanism that is broad-based, equitable and effective in taxing consumption. Reintroduction of GST would broaden the consumption tax base to enhance the narrow tax base as well as to reduce the dependency on oil related revenue. A GST tax rate of 3.0-4.0% is expected to translate into a revenue collection between RM22.1 billion and RM29.5 billion.
27. Motion: The AGM urges the Government to provide tax incentives and rebates to the companies which participated in the Unity Internship Programme (*Program Latihan Industri Perpaduan - PLIP*), and provided 3 months, 6 months or 12 months industrial training for those unemployed due to the Movement Control Order (MCO).

D. Human Resource Development

30. Motion: The AGM urges the Ministry of Education to emphasise practical curriculum that meet industry demand in teaching Science, Technology, Engineering and Mathematics (STEM) in primary and secondary schools in order to cultivate skills workforce that currently encountered serious shortage.
33. Motion: The AGM urges the Government to expedite the recognition of the Unified Examination Certificate (UEC) to allow private independent secondary schools' students to enjoy the same opportunities for further education and employment, as this will help our country to provide training and retain more talents required for industrial development.

F. Security Issue

37. Motion: The AGM urges the enforcement agencies, police and local Governments to take effective measures to fight crimes, and continue to safeguard social security and order so as to create a safe and reliable environment for investment and doing business.

Special Publication of Outstanding Entrepreneurs 2.0

In the spirit of our founders, KLSCCCI has continued to serve both its members and community, particularly in nurturing the next generation of leaders. Even as businesses grow and thrive, the values of our founders continue to be passed on from generation to generation.

In conjunction with the celebration of 110th Anniversary of KLSCCCI in 2014, the Chamber published a commemorative publication “Outstanding Entrepreneurs” as tribute in appreciation of the contribution of members and enterprises to Klang Valley and the country. The Special Publication of Outstanding Entrepreneurs has included 40 write ups in recognizing entrepreneurs’ dedication to the society and their distinctive achievement in the business sector.

With the positive feedback received from the Special Publication of “Outstanding Entrepreneurs”, KLSCCCI is planning to publish the 2nd edition of Special Publication to share on the entrepreneurial spirit and succession planning of selected entrepreneurs in year 2021. The preparations of the publication are in progress.

Reviving Domestic Economy Planning

Many businesses in Malaysia have been negatively impacted by the COVID-19 pandemic and Movement Control Order, the President proposed KLSCCCI to join hands with NCCIM and ACCCIM to come out with a plan that helps to revive domestic economy. After due deliberation, the Reviving Domestic Economy Planning Committee decided that the economy recovery plan will be focused on offline market since E-commerce was assisted under PENJANA. In order to encourage more people to spend at physical stores, the Committee proposed to launch E-Cash Promotion Campaign with government to allocate RM 500 million to subsidise 20% of E-cash purchased. Consumer may spend with the E-cash at any physical stores that accept E-wallet payment. The Chamber has submitted the proposal to Ministry of Finance in August 2020.

Donation to Tzu-Chi Foundation in Support of “Kita1Keluarga Relief Programme”

Tzu-Chi Foundation launched the “Kita1Keluarga Relief Programme” on 11th July 2020, aims to raise funds to reach out to 3,000 poor families in Selangor, Kuala Lumpur and Putrajaya by providing them with financial assistance for 3 consecutive months. From September to November 2020, Tzu Chi estimated that each household will receive a monthly aid of between RM500 to RM800.

The Associated Chinese Chambers of Commerce and Industry of Malaysia (ACCCIM) organised a Briefing Session on “Kita1Keluarga Relief Programme” on 28th July 2020 (Tuesday) at 4.30pm, to provide a platform for Tzu-Chi to explain the relief programme to ACCCIM and the businesses community so as to seek support for poverty alleviation.

KLSCCCI donated RM20,000 to Tzu-Chi Foundation in support of the said relief programme.

Donation to Association of Social Services & Community Development of Gombak District, Selangor

The Chamber donated RM5,000 to Association of Social Services and Community Development of Gombak District, Selangor [*Pertubuhan Perkhidmatan Sosial & Pembangunan Komuniti Daerah Gombak, Selangor* (PSPK)] in support of “Love Touches Lives” Charity Project, which was organised by Malaysia Retail Chain Association (MRCA).

The Charity Project helped and donated to 165 single mothers regardless of race and religion. Many of them are daily wage workers while some of them are suffered from illness or have to look after own disabled children. Some of single mothers are forced to work at old age, to raise their grandchildren after their own children passed away.

Those single mothers were from 6 charity organisations, namely PSPK, Great Heart Charity Association, Kassim Chin Humanity Foundation, *Persatuan Ibu Tunggal Spring Malaysia*, *Persatuan Wanita & Ibu Tunggal Nur Iman KL & Selangor* and Women of Will.

Mr. Foo Kooi Siong, Chairman of Welfare Committee, KLSCCCI attended the presentation ceremony on 13th November 2020 (Friday) at 3.00 p.m. to present the donation on behalf of the Chamber.

Brainstorming Workshop

Council Member Strategy Review Session

The Chamber held the Council Member Strategy Review Session on 11th July 2020 (Saturday), 2.00 p.m. at Seng Peng Hall, KLSCCCI to review the action plans and strategy of the Chamber set two years ago, and to formulate and revise strategies under the new normal.

Action plans formulated in the previous brainstorming session have been reviewed during the session. Besides, the session also discussed on how to promote buy Malaysian products and local tourism.

“Buy Malaysian Products Campaign”

Tan Sri Datuk Ter Leong Yap, President of KLSCCCI indicated that our country's current economic situation is severely affected by the COVID-19 pandemic, economic difficulties and challenges may arise especially after the automatic moratorium on loan repayment programme falls due in October 2020. As the Government has attached great importance to the memorandum and suggestions which were submitted by ACCCIM during the Movement Control Order (MCO) period and implemented some of them, therefore the President hopes that the Chamber can make some efforts to contribute especially during this critical period, such as organising events to activate and revitalize the market, promote domestic consumption, drive economic growth and lead local entrepreneurs to get through this challenging period.

President suggested to refer the "Buy Domestic Products Campaign" or known as "Expo Cintai Malaysia" which was initiated and organised by the Chamber when the financial crisis broke out in 1997. President opined that the situation in the past could promote the purchase of domestic products but now due to the diversification of economy, affected local businesses may not necessarily produce domestic products, they might also sell imported products. Furthermore, retail businesses and service industries are the most affected this time. Therefore, President opined that this event should involve service industries such as tourism businesses, which aims to promote domestic consumption / spending for mutual benefit.

After discussion, the Council members unanimously agreed to the President's proposal to establish an organising committee, comprising of Commerce Committee and Public Relations & Tourism Committee Members and also to jointly organise the event of “Revitalizing Malaysia's Market Consumption” with ACCCIM and NCCIM, proposed to be held between October to 31st December 2020, before end of the year.

Other suggestions:

- i. Suggested to hold online Trade Fair, which could involve service providers such as providing travel package discount
- ii. To seek collaboration with other organisations such as MRCA
- iii. To conceptualize a slogan. Slogan is important to achieve the effect of small profits and quick returns

- iv. Focus on service industries, may follow FMM's initiative to provide a list of suppliers to Government Agencies and provide business opportunities platform
- v. Social media and traditional media play important roles in promotion. Suggested to approach the media, cooperate with media, in order to achieve desired outcomes and goals with media coverage
- vi. Provide consultation on R&R (Restructuring and Rescheduling) assistance or information for businesses which need to delay loan repayment so that more companies could survive. Suggest to members who need to negotiate with banks on R&R matter to seek for assistance from CGC.

How to Promote Local Tourism

ACCCIM has consulted eight Tourism Industry Associations, drafted a proposal on how to revitalize the tourism industry, and submitted it to the Minister of Tourism, Arts and Culture Malaysia. Dato' Tan Tian Meng opined that combining strength from various parties to brainstorm more solutions could promote local tourism and handicrafts. For instance, Apple Vacations Sdn. Bhd. had organised a tour to Pulau Langkawi and explore local tourism business opportunities.

After discussion, suggestions from Council members were as follows:

- Suggested to allow members of related industries to share information on Chamber's official Facebook page free of charge, which can also increase the number of public views on Facebook page.
- Utilise media platforms to promote local tourism promotion activities, in order to encourage and drive domestic consumption, such as to compile information, or form a committee, and then utilise government resources and private influences to promote the local tourism.
- Businesses may follow the example of China in issuing coupons (vouchers) to further stimulate the tourism activities.
- Suggested to launch a local tour campaign, such as "cuti-cuti weekend", to promote short weekend trips.
- Recommended to obtain relevant information from ACCCIM for reference, since ACCCIM has submitted a memorandum on assisting the tourism industry.

Buy Malaysian Product Campaign

The Chamber called a meeting on 11th November 2020 to discuss on how to promote buy Malaysian product in order to alleviate the impact of COVID-19 pandemic to SMEs. After deliberation, the discussion meeting has proposed the following:

1.) Modus of assistance

It was proposed that the Chamber could assist members to promote their products through B2B or B2C platform.

For B2C, it was proposed that we tap into existing platforms as it would otherwise involved huge expenditure, technical support, manpower, etc. which is time and effort consuming. Besides, it would require a big budget to attract the traffic to our platform in order to achieve the results as well as face competition from other platforms. The meeting suggested to explore the collaboration with existing platforms such as Shopee, Lazada to assist members.

For the B2B model, the meeting suggested to create the Chamber's own ecosystem, categorise members and develop a directory to conduct one-to-one or one-to-many business meetings.

Whether to limit only to locally produced products or local branding products will be further decided.

2.) Parties to Collaborate

It was proposed that the Chamber could collaborate with agencies such as MDEC or SITEC, by understanding their scope and plans to assist SMEs and benefit our members.

3.) Action Plan

It was suggested that a survey to be conducted on members on their online procurement, online promotion and operational needs for drafting our action plan.

Besides, Secretariat will form a task group mainly in providing information on members' enquiries pertaining to online marketing, E-Commerce financing, grants and matching agencies, etc.
